OBJECTIVE

I am looking for a new ambitious opportunity so that I can reveal my talents and skills and in the meantime continue my advancement in the sphere of innovation, enhancing my development by learning and mastering new technologies and tools.

ABOUT ME

I am a UX designer with a background in programming. My holistic approach to solving complex problems is the manifestation of my ability to conceive the process as an interdisciplinary art form. I have experience creating web applications, including geographic information and online banking systems.
